Requirements

This project requires Xcode 15 to build and run because of the new Xcode Preview syntax.

However if you're on Xcode 14 or below, you can still open the project and use/look at the code examples.

How to use this project

You can use this project to see examples of how all of the SwiftUI components are used.

Use this for learning or copy and paste the code samples into your own project to speed up your development.

Support

If you require assistance with this project, please visit https://codewithchris.com/contact

If you downloaded this project from somewhere other than on https://codewithchris.com, please let us know!

Thank you and I hope this project can help you!
